PROFILE

Front-end Engineer with over 8 years of experience building scalable web and mobile applications for global companies. Specialized in modern JavaScript frameworks, functional programming, and e-commerce platforms. Known for fast adaptation, ownership of delivery, and consistent positive feedback from clients.

WORK EXPERIENCE

Software Engineer

FullStack Labs - California, US (Remote)

11/2021 - Present

- FullStack Labs operates as a software consultancy, providing top-tier engineering talent for diverse client projects.
- Developed complex front-end solutions for major clients (Lighthouse, MGM Resorts) in international agile teams (3-5 devs).
- Built user-friendly mortgage forms and e-commerce features (entertainment packages, shopping cart), adopting functional programming.
- Successfully delivered features, improved performance/engagement, and launched new functionalities with positive client feedback.
- Enhanced skills in modern front-end tech, functional programming, large-scale architecture, and automated testing.
